Standard Delivery Required Pictures

*Four Required Pictures for
Standard Delivery*

***Orders with
unpack/debris removal:***

**Photograph of appliance with
clean area/debris removed is
required**

STANDARD DELIVERY

Front, Back, Side 1, Side 2

Refrigerator Installation Required Pictures

*Five Required Pictures
for Installations*

INSTALLATION

Document connections made with no leaks

Illustrate location of shut off valve

Document unit in operation

Quantify unit in final position, leveled and free of plastic, packaging.

Washing Machine Installation Required Pictures

*Five Required Pictures
for Installations*

INSTALLATION

Document Existing valve and drain setups. This is crucial in claims investigations. Some areas may require and already be utilizing Water Hammers. Be mindful of the gaskets and reutilization of such here. If the customer is utilizing a drain pan, capture the integrity of the pan when the existing unit is removed and before the new unit is put into place.

Ensure unit is level to meet manufacturer specifications

Illustrate connections have been made and tested for leaks. What's wrong with this standpipe connection?

Document unit in operation prior to departure.

Electric Dryer Installation Required Pictures

Five Required Pictures
for Installations

INSTALLATION

Quantify connections required on site. 4 prong or 3 prong.

Ensure proper connections are made and documented WITH strain relief

Illustrate unit is in place and level

It's difficult to visually confirm a dryer in operation. Illustrating that you've ensured its functionality prior to departure is key.

Gas Dryer Installation Required Pictures

*Five Required Pictures
for Installations*

INSTALLATION

**Quantify connections made on site.
Water, Gas, LP, electric, ventilation, etc.**

Document the LP kit has been installed.

**Illustrate connections have been made
and tested for leaks**

**It's difficult to visually confirm a dryer in
operation. Illustrating that you've
ensured its functionality prior to
departure is key.**

Dishwasher Installation Required Pictures

*Five Required Pictures
for Installations*

INSTALLATION

Document supply and drain connections with no leaks

Illustrate the unit was functional prior to departure by documenting water beads on the inside of the unit.

Illustrate how you've mounted & leveled the unit, causing no damage to cabinetry. Cabinetry claims are the #1 reason for claims with built-in appliances. Unlevel units are the #1 reason for service calls.

Showing unit is wiped down, plastic removed, and power on to show function.

Electric & Gas Stove Installation Required Pictures

***Five Required Pictures
for Installations***

Document Anti-tip Device installed

**Illustrate connections have been made
and tested for leaks.**

**Ensure unit is level to meet manufacturer
specifications**

**Document unit in operation prior to
departure.**

Microwaves Installation Required Pictures

**Five Required Pictures
for Installations**

INSTALLATION

Mounting bracket secured and installed

Venting secured (if applicable) and power cord plugged in.

Mounting bolt flush with cabinetry

Unit is wiped down, plastic removed, and power on to show function.

Hood Vent Installation Required Pictures

**Five Required Pictures
for Installations**

INSTALLATION

Document the placement of the mount if applicable.

Capture the ventilation setup, if applicable.

Quantify the unit in operation prior to departure. (The paper illustrates the fan in operation.)

Document the unit in final position free of debris and packaging.
